## Oracle Database AI Capabilities Deep-Dive Workshop - Approved

The workshop, Oracle Database AI Capabilities Deep-Dive Workshop, has been approved. Congratulations!

### What's Next?

#### Workshop Team,

Your Workshop has now been approved by the Workshop Council. Here's what you should do next. Please keep your workshop status up to date. You are responsible for updating the status.

1. Setup your environment to prepare to contribute to Oracle-LiveLabs GitHub using the [LiveLabs Step by Step workshop](#).
2. Copy **STARTER WORKSHOP** files from the [common repo](#) to the desired folder for your workshop and use that as a starting point.
3. When you begin development, change your workshop status to **In Development** in WMS.
4. Ensure you sync your repo to have the latest files.
5. Chat with your workshop team by clicking [Message with Team](#) in WMS.
6. Refer to the [Self QA Checklist](#) tab in the WMS or ask fellow workshop developers questions on #workshop-authors-help.
7. After you finish developing your workshop, move your workshop status to **Self QA** in WMS.
8. QA your workshop by following the [Self QA Checklist](#) tab in the WMS and save it. Then, move your workshop status to **Self QA Completed** in WMS.
9. Questions for admins or want us to review your architecture? Email livelabs-help\_us@oracle.com.
10. Want to ask the stakeholders questions? Email livelabs-help-aisolutions\_us\_grp@oracle.com.

### [Details](#)

**Workshop Status:** Approved

**ID:** 12002

**Short Description:**

Livelab walk-through workshop for Oracle Database AI Vector Search and Select AI.
